Designed to reduce landing impact for a smooth step every time

NEW CMEVA FOAM

Designed to provide a lively, responsive experience

EARLY STAGE META-ROCKER

Designed for a smooth transition through toe-off

ENGINEERED JACQUARD MESH

Utilizes recycled material

KAWANA
SOFT. SMOOTH. BLISS.

Earning its moniker from the Gold Coast's famous beach break, the **Kawana** continues to push the boundaries of HOKA foams and geometries. Breaking the mold with a **lively new foam** that provides solid rebound without packing out, this accessible trainer delivers an incredibly well-balanced ride. Sporting a modified **crash pad** with **SwallowTail™ geometry**, the Kawana's beveled heel creates a broader, flatter surface designed for smoother heel strikes.

GLIDE | SIGNATURE CUSHION, SMOOTH RIDE

| | |
|-----------------|------------------------------------|
| GEOMETRY | W 27mm heel 22mm forefoot |
| | M 30mm heel 25mm forefoot |
| WEIGHTS | W 8.4 oz. 237g |
| | M 10 oz. 283g |
| SIZES | W 5 - 11 (B) |
| | M 7 - 13, 14 (D) |

Product Measurements are based on a Men's Size 9 and Women's Size 7. Variations will occur based on actual size and production, and should be used for general comparison purposes only.

WHY YOU'LL LOVE IT

- A maximal-cushion midsole designed with an all-new foam to provide support that lasts;
- We've gone all-in on HOKA geometries, including the SwallowTail™ extended-heel geometry, designed to provide an endlessly smooth ride;
- Kawana is designed to provide maximal HOKA comfort at any pace.

HOW IT COMPARES

BONDI 7

- Both the Kawana and Bondi 7 feature maximal HOKA cushion and our unique geometry designed to provide a smooth, supportive ride at any pace;
- The Kawana features a more responsive CMEVA foam and SwallowTail™ geometry designed to provide a dynamic, versatile trainer experience, while the Bondi 7 is designed for a maximally-soft-and-smooth running and walking performance.

SOLIMAR

- Both the Kawana and Solimar bring HOKA cushioning and smooth geometry to dynamic, versatile training shoes designed to handle movement at any pace;
- The Kawana is designed to provide a more cushioned, stable ride with maximal step-in comfort, while the Solimar is designed with a lower stack height to be more performance-oriented.
